COVES

the original edgeless cove

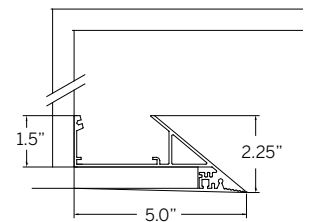

Edgeless

Shallow uplight with knife edge ceiling treatment

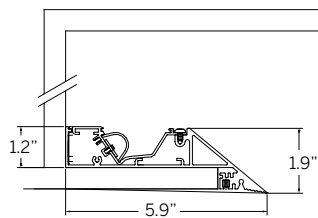

Nose

Pre-painted, non-illuminated knife edge detail

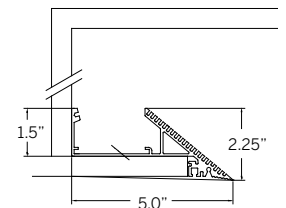

Mini Edgeless

Minimal sized uplight with knife-edge detail

P Nose

Field-Plaster and paint finished, non-illuminated

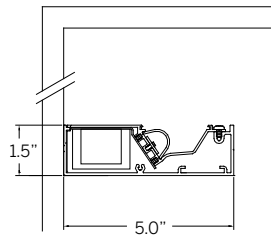

Coves and Perimeter Lighting Systems

- Compact sized luminaires deliver low angle light for indirect and wallwash applications
- 10:1 light projection; 1' from the ceiling gives light at least 10' away
- Plaster-in and ACT knife edge detail
- Consistent LED technology throughout all coves and linears for uniform performance
- Lengths and angles factory cut to exact field dimensions
- Continuous illumination through straight runs and corners

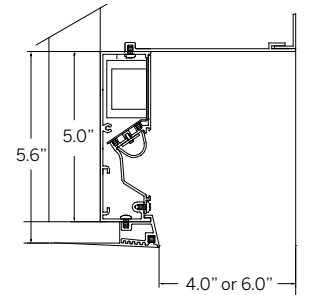

Standardized high performance optics

Box Cove

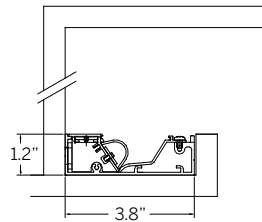

Indirect for surface mount or direct wall mount

V Cove

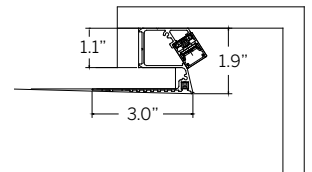

Perimeter wall wash with hidden source and knife edge detail for both gypsum and tile ceilings

Mini Box Cove

Reduced size for surface or wall mount uplight

Mini Z Cove

Miniature continuous perimeter light with knife edge detail

LED Boards

- The same LED boards used throughout the product range
- High efficiency LED; 105 lumens per watt at 3000K
- Available in 2700K, 3000K, 3500K, 4000K and some custom color temps
- 82+ CRI, LM79 and LM80 tested
- Field replaceable LED boards in Low-Medium-High output boards (3w-6w-10w/ft)
- LED optimized snap-on lensing

whitegoods

Minimal detail across a wide range of highly integrated lighting products .

Reduction of detail and seamless architectural integration.

Logical, modular systems and families of products facilitates ease of specification, manufacturing, installation and sustainability.

Matching ceiling interface details and apertures allows a consistent language of light throughout the project.
